

Vintage 2006

After a fairly cold and dry winter, we had a rainy mild spring. In the summer we experienced periods of drought. The nights were cool in August which kept the grapes healthy. Harvest started the last week of September with the vines from the hills of the locality of Greffieux with sunny and windy conditions. The grapes were at perfect maturity and the sorting took place in the cellar. After 28 days of fermentation, the wines were barrelled. They already reveal a deep colour and a good tannin structure.
